Art Unit: 3754

DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the subject matter recited in claims 7, 8 and 14-16 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective Application/Control Number: 10/565,399

Art Unit: 3754

action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

Page 3

2. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in Exparte Wu, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of Ex parte Steigewald, 131 USPQ 74 (Bd. App. 1961); Ex parte Hall, 83 USPQ 38 (Bd. App. 1948); and Ex parte Hasche, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 6 recites the broad recitation "...cross section is greater than 1", and the claim also recites "preferably greater than or equal to \(\sqrt{2}\)", which is the narrower statement of the range/limitation.

Application/Control Number: 10/565,399 Page 4

Art Unit: 3754

The rejection is based on the claims as they are best understood.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 7-10, 14-16 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. 3,578,075 to Winter.

The patent to Winter discloses a hose, fig. 5 (15), including a flow channel for liquids having at least one wall defining a flow channel of such configuration that when a liquid flows therethrough at least one flow region is produced that has an axial and tangential flow arrangement, wherein the flow cross section is non-cylindrical and twisted upon itself in the axial direction so that when liquid flows there through a spiral-form flow is produced at least in a region-wise manner, as recited in claims 1-3. Fig. 5 discloses the flow cross-section decreases and increases in the flow direction, as recited in claims 7 and 8. Fig. 6 discloses the flow cross-section in a triangular shape.

4. Claims are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. 862,919 to Isaacs et al..

Art Unit: 3754

The patent to Isaacs et al. discloses a helically wound pipe including a flow channel for liquids having at least one wall defining a flow channel of such configuration that when a liquid flows therethrough at least one flow region is produced that has an axial and tangential flow arrangement, wherein the flow cross section is non-cylindrical and twisted upon itself in the axial direction so that when liquid flows there through a spiral-form flow is produced at least in a region-wise manner, as recited in claims 1-3. Fig. 3 discloses the cross section having an oval cross section, as recited in claim 5.

Allowable Subject Matter

5. Claims 11-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references are pertinent to Applicant's invention in disclosing spirally wound tubing devices for fluid flow therethrough.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Patrick F. Brinson** whose telephone number is (571) 272-4897. The examiner can normally be reached on M-F 7:30-3:00.

Art Unit: 3754

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, **Kevin P. Shaver** can be reached on (571) 272-4720. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
